Renseignements pratiques

Programme

CANTOGETHER will design, test and assess innovative mixed farming and territorial systems, based on the simultaneous utilization of crops and animals. CANTOGETHER will demonstrate the relevance of systems combining crops and animals to increase sustainability of farms and regions.

Débouchés

At the end of the module, the listener will know what are the mixed or integrated crop-livestock farming systems and will be able to appreciate if these systems are a valuable way of evolution of the European agriculture.
